MURRAY CHAMBERS

MURRAY CHAMBERS

Regent Honeyeater nest and fledgling

Turning the tide on Regent Honeyeaters

Join **Northern Tablelands Local Land Services** and **Landcare** to learn more about the critically endangered Regent Honeyeater and how you can help them survive.

Tuesday 2 April 2019 - 10:00am - 1:00pm
Gwydir Park Road, Travelling Stock Reserve

Speakers: **Ross Crates** Australian National University Lead Researcher - Regent Honeyeater
Dr Paul McDonald University of New England
- Associate Professor School of Environmental & Rural Science
Emily Mowat Birdlife Australia NSW Woodland Birds Project Officer

Topics:

- identifying the main threats to Regent Honeyeaters,
- identifying food sources and habitats,
- the benefits of habitat restoration for other woodland birds,
- current programs on the Northern Tablelands, and how you can be involved.

What to bring:

Camp chair, hat, water bottle, comfortable walking shoes, sensible clothes (*preferably long trousers and long sleeved shirt*)

Cost: Free

Catering: Morning Tea and Lunch provided

RSVP by Monday 1 April 2019
