

Are honeybees the best?

What makes a good pollinator?

How can we attract native pollinators to our bush and our gardens?

What use are flies?

How can we attract native pollinators to our bush and our gardens?

6 Legged Flower Visitors.

Insects that keep plants alive in our bush and gardens.

Dr Sue Jaggar has studied pollination ecology, she is now the Environmental Services Coordinator at the tree group and keen to share the wonders of the insect world with all nature lovers.

Come along to the Tree Group and learn about the forgotten pollinators and their amazing life stories.

Who for:

Anyone interested in nature.
Adults and children welcome.

When and where:

Thursday 13 July, 5pm,
Armidale Tree Group, 80 Mann St Armidale.

Cost: \$10. Drinks and Nibbles provided. RSVP to help with catering.
es@armidaletreegroup.org.au or 0436 017 878
