Harnham Landcare Group presents

# Balance & Boom

## Kinsey-Albrecht Soil Balancing Workshop Series with Derek Smith

Formulate a long-term plan for your soil management so in 5, 10 and 20 years time, your farm is in better shape and more resilient to challenges.

Derek Smith, one of only 4 Kinsey-Albrecht Soil Practitioners in Australia, will guide and mentor you through this 4-day soil management program.

Days 1 & 2 (28 Feb - 1 Mar 2018) focus on how and why soils respond in certain ways to inputs, stock management and farming practises. Explore options to improve outcomes in the short, medium and long term.

Day 3 (16 May 2018) engages animal nutritionist and Kinsey-Albrecht Soil Practitioner, Peter Norwood from Full Circle Nutrition, Victoria. See how balanced healthy soils equate to higher quality pastures and crops with increased production. This day will be open to the paying public, while Balance & Boom program participants will attend for free.

Day 4 (31 May 2018) brings participants together in a practical group session to study their own soil test results analysed using the world-renowned Albrecht analysis system. Find out:

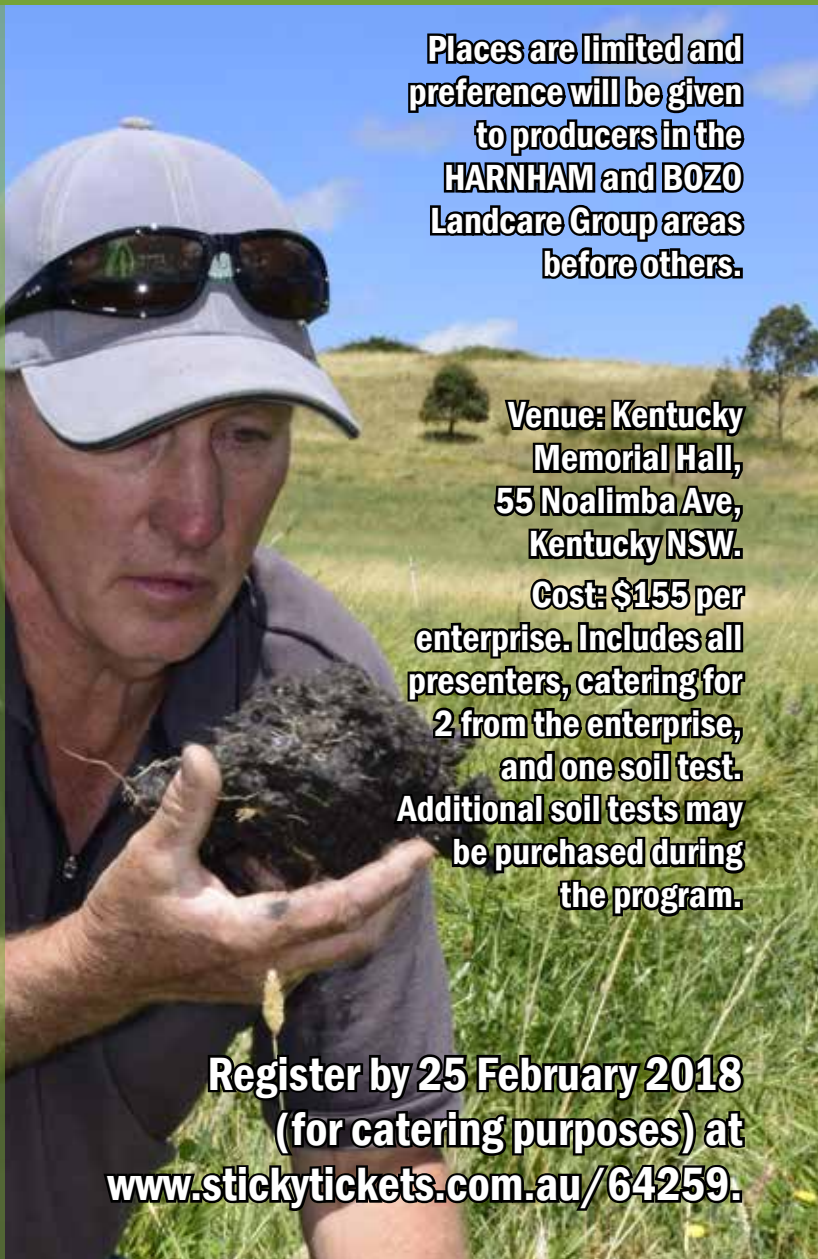

- exactly how recommendations are calculated
- which management strategies will produce the desired result
- how to mix and spread the recommended ammendments
- time frames for re-testing.

**Places are limited and preference will be given to producers in the HARNHAM and BOZO Landcare Group areas before others.**

**Venue: Kentucky Memorial Hall, 55 Noalimba Ave, Kentucky NSW.**

**Cost: \$155 per enterprise. Includes all presenters, catering for 2 from the enterprise, and one soil test. Additional soil tests may be purchased during the program.**

**Register by 25 February 2018 (for catering purposes) at [www.stickytickets.com.au/64259](http://www.stickytickets.com.au/64259).**

*This project is supported by Southern New England Landcare Ltd, NENW Landcare Network Chairs Inc. and Northern Tablelands Local Land Services, through funding from the Australian Government's National Landcare Program.*
