# BIODIVERSITY & CLIMATE CHANGE ROADSHOW

## How can we conserve species from the impacts of climate change?

Do you know how to find and use available climate information to support adaptation planning for species and ecosystems in your local region? Would you like to learn about the new methods and web tools delivered by the NSW Adaptation Research Hub, to support adaptation planning for biodiversity?

### You're invited!

The information in these sessions will suit academics, natural resource managers, decision-makers, scientists and conservation practitioners, at all levels. There are 7 different venues, so don't miss out.

### Program highlights

- Presentations, case studies & demonstrations
- Opportunity to ask questions & connect with other adaptation practitioners over lunch

## 2018 Program

—  
Sydney CBD 20  
September

—  
Parramatta 11  
October

—  
Bathurst 23  
October

—
