

What's the **REAL** CONNECTION BETWEEN SOIL FERTILITY AND ANIMAL HEALTH?

How your choices for **soil fertility** can affect your **animal health outcomes**.

YOU'LL LEARN:

The real link between **soil fertility**, **forage quality**, and **animal health**.

How mineral balance, trace elements, and soil biology impact **immunity**, **reproduction**, and **performance**.

Practical soil fertility choices that lead to more **resilient** animals and **better outcomes**.

Simple steps you can take **right now** to improve both soil and animal health.

DATE:

Monday 17th August 2026

TIME:

9am to 3pm

LOCATION:

Guyra Soldiers Memorial Hall
163 Bradley Street
Guyra NSW 2365

MEET YOUR SPEAKERS:

Emily House – Metamorphic Ag

Agroecology Educator and Animal Nutrition Specialist who consults with farmers to improve productivity by focusing on soil health, pasture diversity, grazing management, and overall climate resilience. A frequent speaker and educator in the regenerative agriculture sector.

Kate Usmar – Alongside AG

Kate works alongside producers to build profitable, resilient farming businesses. Drawing on 25+ years of experience in cattle production, grazing and livestock management, she helps farmers make practical changes that improve both farm performance and landscape resilience.
